### THIRD TERM E-LEARNING NOTE

**SUBJECT: COMPUTER STUDIES**

**CLASS: JSS2**

#### SCHEME OF WORK

WEEK	TOPIC
1.	Internet I
2.	Internet Browser
3.	Benefits of using the Internet
4.	Abuse of the Internet
5.	Computer Network
6.	Data Communication
7.	Computer Ethics
8.	Ways of misusing the Computer System
9.	Safety Measures I
10.	Safety Measures II

#### WEEK ONE

##### TOPIC - INTERNET I

##### Reference Book

A handbook on Computer Studies (PRACTICAL GUIDE) for Schools and Colleges by NiyiAdekolegan

##### CONTENT

The word “**INTERNET**” stands for International Network simply put as NET. It comprises of all computers around the world, connected together to share resources and information irrespective of distance and/or geographical location. The Internet is a worldwide communication medium or pool from where people all over the world could exchange retrieve, disseminate and store information thus, turning the world into a **global village**. It is the use of internet that actually turns the world into a global village where users like government, military, educational and commercial institutions around the world becomes one. There is no person, company, government or country that can claim single ownership of the internet. The computers within the internet are connected via communication equipments including telephone lines i.e. wired or wireless, satellites etc.

#### WHAT IS INTERNET?

The internet that is International Network is an electronic means of communication via a computer network, whereby people all over the world can have access to information at any time in a matter of seconds. Information can be given to people all over the world to see and retrieve at the same time using computer and telephone. It is the fastest and the most reliable means of data and information transfer.

Internet is a...
